

BAUMANN MEYER

BAUMANN MEYER

Baumann Meyer LCD televisions are the result of 14 years of experience with LCD panel technology strengthened by ongoing dedication to research and development of television drive systems, the engine and processor responsible for television picture quality.

The result is soft balanced skin tones, realistic colour, outstanding sharpness and black levels which combine to give an almost three dimensional depth of field and stunning life like picture.

Following European design fundamentals of functionality and aesthetic neutrality the **Baumann Meyer** LCD Television range is elegantly understated with stylish slim lines and compact footprint. Finished in either Piano Black with contrasting silver or stunning warm satin white. Baumann Meyer LCD televisions comfortably blend with both traditional and contemporary environments.

Baumann Meyer LCD Televisions are designed for ease of use and our development team clearly understand that a television should be simple and logical to operate. For this reason we combine the highest standards of technological advancement with simple and logical user functionality.

HIGH DEFINITION TELEVISION HAS NEVER BEEN SO SIMPLE

DT2620DBP 66cm (26") **DT3220DBP 81cm (32")**

Continuing the Baumann Meyer tradition of form and function the new 26" and 32" LCD Television range combine ultra slim bezel design with the latest Baumann Meyer high performance processor known as QIA3. The result is a sharper more detailed picture with outstanding black levels and smooth fluid movement. The integrated High Definition Television tuner unlocks a host of new television stations and the

digital picture clarity will leave you mesmerised. Simplicity of use is achieved with clear easy to read menu icons and the ability to program custom buttons to simplify operations to a couple of presses of the remote control. We have even calibrated the Scart S-Video input to maximise picture quality from Australian's Foxtel cable television resulting in cable TV with levels of clarity and detail never seen before.

FULL HD 1080p HOME CINEMA RANGE

Full HD DT4060DFBC 101cm (40") **Full HD DT4660DFWC 116cm (46")**

Introducing the new Baumann Meyer flagship Home Cinema 40" and 46" Full HD 1080p (1920 x 1080) range. Full High Definition television in all its glory, the new Home Cinema range takes clarity and detail to new levels of excellence. The QIA3 Full HD engine with its immense processing power produces smooth 1920 x 1080

resolution visuals from 1080p source material including Blue Ray true Cinema 24 frames. The on board High Definition Digital Tuner offers outstanding free to air television clarity and simplicity of operation while detachable speakers and digital audio output allows easy integration into the Home entertainment system.

HIGH DEFINITION TELEVISION HAS NEVER BEEN SO SIMPLE TO USE

Integrated High Definition Digital Tuner

Ease of use and stunning High Definition picture quality come standard with Baumann Meyer's fully Integrated High Definition television Tuner and simple one remote control operation. No external digital box required.

QIA3 & QIA3 Full HD Engine

The latest Baumann Meyer QIA3 (Quantum Interpolation Algorithm Generation 3) engine offers immense processor power that virtually eliminates all visual noise by identifying edges of moving images within a scene and adjusting the blending angle so that interpolation always follows the image edge rather than crossing over it. As a result jagged edge artefacts and staircasing are virtually eliminated resulting in a smooth natural picture. QIA generation 3 has made significant advances in black and grey scale saturation resulting in greater detail and image depth of field. The QIA3 and QIA3 Full HD processors set Baumann Meyer at the forefront of LCD Television technology.

6ms Response Time

If sporting events or fast moving action films are your style then response time is a very important part of your viewing enjoyment. With a fast response time of 6ms Baumann Meyer LCD Televisions give smooth, fluid, natural movement without the jagged motion of lesser products.

Natural Colour

Natural and realistic skin tones and colour balance have been a hallmark of Baumann Meyer since our very first LCD Television. Natural Colour – is a special program that allows fine-tuning of individual sub colours through the adjustment of the Red, Blue and Green colour temperature attenuation to achieve the most accurate natural picture balance.

Future Connect

Blue Ray, Media Centre, DVD player, video, games consol, personal computer and digital camera are just a few of the current technologies to connect to a television. In the future there will even be more technology to choose from, so Baumann Meyer have designed our Digital televisions with 8 separate interface connections, for the connection of present and future technologies.

2 way HiFi Speakers

Within the slimline body design of Baumann Meyer televisions are two independent stereo speaker enclosures, each housing tweeter and woofer and coupled to a graphic equaliser processor to give clear, detailed HiFi sound.

SRS WOW

The SRS mode creates a multi-speaker surround effect from the 2 channel integrated stereo speakers. Through boosting particular frequency levels the televisions audio speakers appear to project beyond the television, creating a wide sound stage effect.

Sleep Timer

Set the television to this mode and fall into slumber while viewing your favourite late night program. The television can be set to turn off between 5 and 180 minutes so you can rest assured that you won't be woken in the early hours by an unwanted program.

3 YEARS Warranty

At Baumann Meyer we put quality and service as our top priority. Should a problem occur all Baumann Meyer Digital LCD televisions come with a 3 Year Warranty.
